This is a wonderful story of a young American museum curator who unexpectedly finds herself caught in the web of a ruthless stolen art ring centered in the Edinburgh area. Thousands of dollars of medieval artifacts are missing. Teaming up with a dashing member of Scotland Yard's Art Crimes Unit, the two must weave their way through clues and dangers to expose the thieves and recover the artifacts. When a priceless tapestry goes missing and bodies of people close to the museum begin to pile up, their investigation takes a critical turn.

The Edinburgh and local castle locations are written so vividly, you can't help but want to visit these places. Through the entire story, I imagined how perfectly *The Seventh Tapestry* would fit into the British crime drama mystery television series, *Midsummer Midsomer Murders*. It went for 24 seasons. I think it is time for the 25th season.

The Seventh Tapestry is an easy read and well worth your time. I recommend it highly and can't wait for the sequel.
